Professional Summary

I am a UX Designer with 2+ Years of internship experience across Product startups, and B2B SaaS. A generalist who has worked across the full design spectrum of User research, Interaction design, Ux Design and Visual design, I am increasingly drawn to the intersection where technical complexity meets user clarity. While trying to develop a specialism, I have found myself aligning with large-scale enterprise projects.

Work Experience

Devnco Technologies

UX Design Intern

Full Time

Jan 2026 – Present

- Designing end-to-end UX for a B2B AI-powered Intelligent Document Processing (IDP) SaaS platform, a technically complex product space where making dense information legible for 4+ enterprise users groups.

Antef

UX Design Intern

Full Time

Jun 2025 – Sep 2025

- Redesigned Geodit, B2X shapefile-integrated GIS survey platform for Android. Serving 2+ different user types: admin teams managing surveys and field surveyors working on the ground.
- Started with a full UX audit across usability, accessibility, and interaction gaps. Translated findings into a clear redesign scope in direct collaboration with the CEO. Moved from mid-fidelity component exploration to high-fidelity prototypes. Achieving a significantly higher accessibility score.
- Stayed involved through launch, working closely with the development team to refine implementation details and make sure the design intent carried through to the final product

Enviro Genesis

UX Design Intern

Part time

Nov 2024 – Apr 2025

- Designed the responsive business website for Enviro genesis, a waste management product manufacturing company. Created and designed user flows, wireframes, and high-fidelity prototypes, working directly with company leadership to align design with business goals across multiple review rounds.
- Partnered with 3D designers to integrate 12 visual assets into the digital experience, maintaining brand consistency across digital and physical touch points. Delivered detailed handoff documentation for outsourced developers, specs and interaction notes.
- Designed the product brochure in parallel, communicating the company's vision and offerings through a cohesive, print-ready layout.

Ystocxx

UX Designer

Part time

Jul 2024 – Oct 2024

- Joined an early-stage creator economy trading platform (IIT Madras co-founders) with no existing UI. Started from stakeholder conversations about use cases and built out user flows, wireframes, and initial screen designs from scratch
- Designed investor-facing pitch decks that distilled the startup's value proposition, business model, and market potential into a clear visual narrative, supporting early fundraising and partnership conversations

Zestrix Solutions

Visual Design Intern

Part time

Mar 2024 – Jun 2024

- Contributed to a Maharashtra Government project , Har Ghar Jal-Jal Jeevan Mission, creating visual communication materials across digital and print formats. Designed promotional materials, social media graphics, branding elements, and marketing collateral including packaging, using Photoshop, Illustrator, and InDesign
